

Talent Tutors brings students, teachers and institutes together with ease

TalentTutors.com is UAE's largest and most trusted marketplace that provides a platform for students to connect with the best tutors and institutes. Our vision is to be a completely free platform for students to get access to the best teachers directly without any agency costs or lengthy processes.

With a strong desire to meet the needs of students aspiring to achieve better grades and to match them with credible tutors looking to impart knowledge – Talenttutors.com was formed.

Beyond Biology

Three disparate things that I read recently made me sit up and take another look at the threat that biotechnology poses to the future of humankind. The first was an announcement made by scientists of the J Craig Venter Institute on their work on genome transplantation that enabled them to transform one kind of bacteria to another type.

Science Fair Projects to Make Everybody Happy

Science fair projects – Kids think they should be fun. Teachers think they should be educational. Parents just want them to be fast and easy. Since students, teachers and parents are all involved in the process of getting ready for the science fair, most of the time, science projects have to be all of the above!

As a result, finding the perfect science fair project can be difficult. Here are five steps to finding a project that will make everybody happy.

There are five kinds of projects, and many a student has had their project idea rejected because of a science technicality. Make sure you know if the science teacher requires an experimental (investigatory) project, a demonstration of a science principle, a report on a subject in science, a collection of items, or a scientific model.

Learning the Arabic Language

The Arabic language is an ancient tongue that dates back to earlier than the 6th century. It is a language steeped in history, and shrouded in mystery. Today, the Arabic language is the 5th most spoken language on the planet, and it is the official language in many Middle Eastern countries, such as Egypt, Iraq, Jordan, Israel, Morocco, and Saudi Arabia. If you are interested in the study of ancient Near Eastern history, modern Middle Eastern history, religion, or foreign language, learning the Arabic language will help you in your academic pursuits. There are several ways you can go about learning how to read, write, and speak Arabic.

Fun In Science

Science contains the knowledge gained through observations and experimentations. Science is the subject of fun. Science has changed our lives like it has changed the living standard of people. Science is first divided into three categories like applied sciences, pure sciences and art/social sciences (science is contained in arts). Science comes from arts like diagrams to show data after experiments.

There is a lot of fun in science. Science is taught today as a serious subject in school with no fun just simple aim that almost 90 percent students have is to secure high grades in it which is really wrong.

Many successful in this world who have done great contributions to science and arts were really inspired by it and they felt fun whenever they studied it. A person who finds fun when studying science is the person who will really find himself successful in it.
