

## **MAKE AN IMPACT BY PARTNERING WITH OUR SUPPLY CHAIN PLATFORM**

At TFX Islamic – we believe in growing the people that run businesses. With that in mind, we offer a supply chain finance platform that is like no other that you have experienced before. It connects you, your business and your partners with security and efficiency.

Our digital platform is easy to use and it links buyers, sellers and financial institutions at the touch of fingertips, making it possible for you to focus more on yourself and your business. In short, TFX Islamic allows you to unfold the possibilities in you and your business.

## **HOW TFX ISLAMIC WORKS**

Supply Chain Finance is arranged between buyer, financial institution and seller. Buyer and financial institution enters into supply chain financing programme and onboard sellers eligible for financing.

Tawarruq Supply Chain Finance is a short term working capital to finance sellers' local sales and intangible goods or services. For Trade Tawaruq, finance provider earns profits over Murabahah financing. Murabahah financing takes place when finance provider purchases the asset or commodity from a third party and resells it to the supplier.

## **EXCHANGING THROUGH CHAINS**

TFX Islamic is a subsidiary of TFX Global; a specialist originator of Supply Chain Trade Finance. TFX Global provides service & technology-driven based business and financing process that link various parties in a transaction – buyer, seller and financing institutions while ensuring the risk is mitigated along the supply chain.

In recent years, the supply trade financing landscape has evolved greatly. Corporations are seeking different avenues to improve the supply chain significantly. As such TFX Islamic was created with the aim to bring together the elements of security, flexibility and simplicity.

It is a supply chain financing like no other, TFX Islamic not only links partners but it also creates a vendor management system, connecting buyers, sellers and financial institutions on our online digital platform. Most importantly – this is done with security and simplicity in mind, making it easy to use while the risk is mitigated along with the supply chain system.
